In addition, the new WHATSAPP BETA UWP offers multi-device support, and therefore, you can use it Keep your phone connected to the Internet. For more tips of this type, visit our article about whatsapp's best tips and tricks. 6. 5. WhatsApp Desktop UWP vs WhatsApp Desktop Electron: Initial prints Based on my brief use, á ç it is insured that whatsapp's desktop UWP application is a significant step in terms of performance and reliability. You can even see the number of non-read messages in the preview of the notification. 2. 4. Nor does it have á™ support for dark mode. Check the next step to learn how to access the Á ç á ç co-linked devices' screen. Now you need to scan the QR code using your smartphone after joining the multidispositive beta. As it is an UWP application, you can use it in Windows 10 and Windows 11. WhatsApp has a desktop application for Windows and Mac for some time ago. Click to start session with your whatsapp account. In an attempt to improve the native desktop experience, whatsapp has now launched a UWP version (Windows Universal Platform) of its desktop application in Beta version for Windows 10 users and 11. Take a look at the execution function below : Another outstanding aspects of the Beta UWP desktop application is the possibility of receiving whatsapp message notifications without having to keep the application open all the time. Test WhatsApp Beta APP based on UWP on your PC with Windows So it was a quick look at the new WhatsApp Beta desktop application for Windows PC based on the Universal Windows platform. If not á ç having the new Microsoft Store on your PC with Windows 10, follow our simple step-by-step guide on how to install the Windows 11 Microsoft Store on your PC with Windows 10. With support for native notifications and better performance, New Application WhatsApp Desktop UWP is to replace the current ³ application WhatsApp Desktop Electron. Now, join the multi-device beta if you see the option ³ and click Link to a device Á ç Á to scan the ³ QR code shown in the WhatsApp UWP beta desktop app ³ your Windows PC. Visit the Microsoft Store's WhatsApp Beta listing (h/t: WindowsBlogItalia for the and click the blue çAAAGeteAAA button present at the right corner of the screen. You can check out the video below for a quick walkthrough of the new WhatsApp desktop beta interface on Windows: Having said all that, it does lack some features at the moment. On your Android smartphone, tap the vertical three dots icon in your WhatsApp app and choose çAAALinked devicesçAAA. To test the performance, I logged in using the same account on WhatsApp desktop (Electron) and the UWP Beta. Click on the çAAAGeteAAA button again in the Microsoft Store to download the WhatsApp Beta UWP app on your Windows 11 or Windows 10 PC. Install WhatsApp Beta UWP Desktop App on Windows 10 and 11 The new WhatsApp beta UWP app was first spotted by Aggiornamenti Lumia. As you can see below, the new UWP app takes up significantly less RAM while showing the same list of conversations. On your iPhone, move to the çAAASettingsçAAA tab from the bottom navigation bar to access the çAAALinked devicesçAAA option. 3. However, we will have to wait until WhatsApp adds the missing features ahead of the stable release. release.
